

HYDRAULIC TEST BENCH

The Hydraulic Test Bench (HTB) is a portable Hydraulic Power Pack that is used to provide controlled rotational drive to the AAG or IAAG for shore based maintenance and test purposes. The HTB is also used to purge air from the AAG or IAAG hydraulics and to add or renew the hydraulic oil as required.

Parameter	Value
Length	1100mm
Width	790mm
Height	1350mm
Shipping Mass	350kg
Electrical	3 Phase, 50-60Hz, 480V-346V, 7.5kW
Oil Fill	35 Litres (approximately)
